

STUDENT SEMINARS

Almost every high school student now takes the ACT or SAT. Securing a good score can assure graduation, qualify students for CCP opportunities, & perhaps, most importantly, help students gain admission to college & obtain essential financial aid.

Our six-hour student preparation seminar helps demystify the ACT or SAT by explaining...
the test's structure,
the academic content covered on it, &
testing & time management strategies students can employ to maximize their performance.

Students learn specific, tangible strategies to answer more questions correctly, how to decipher questions designed to thwart their performance, & specific academic content that is regularly tested on the ACT or SAT.

In addition to the 6 hours of live, engaging, interactive instruction, each seminar participant gets a comprehensive, 400-page, reference workbook that reviews testing strategies and academic content as well as includes sample tests with detailed answers, online access to hundreds of additional practice test questions, & free, live, phone-in, pre-test tutoring during the week before each national ACT & SAT test administration.

The day-long, six-hour seminar typically is held at school during a school day. In this manner, we can attract a maximum number of students, thereby affecting the school's college entrance exam profile while keeping the cost per student at a minimum.

More about Next Level Prep ACT & SAT Preparation Seminars

Next Level Prep also can combine college application guidance & ACT/SAT preparation into one day-long seminar for students. The college admissions segment includes approximately 50 minutes of instruction aimed at what college admissions officers look for as they read through applications and how students can present themselves to maximize their chances for successful consideration. The principal of Next Level Prep served on a major university admissions committee. So, we understand the elements of applications, what criteria colleges seek, how they discern applicant attributes from application folders, and what students need to include in their folders to present themselves in a complete, accurate, and positive manner.

We already are working with over 80 Ohio high schools, including Hudson, Stow, Massillon Jackson, Cleveland Heights, New Albany, Columbus South, Ft. Hayes HS, St. Charles, Beavercreek, Strongsville, & Dawson-Bryant among many others.

Our prices are quite affordable. Between a school contribution & per student tuition, the total cost is well under \$100 per student. Because we typically attract over 100 students to one of our in-school seminars, we can keep the price at an affordable level.

"Thank you so much. I look forward to taking the ACT again after this session."

CJ, New Albany HS

"The lessons were AMAZING. You were very informative & extremely engaging. You kept the seminar interesting & were very inclusive."

JB, Centennial HS

TEACHER SEMINARS

Often our students don't perform as well on the ACT or SAT as they do in the classroom. Through our seminar, teachers can help them improve their scores on college entrance exams—without much of an adjustment in how they conduct their daily classes.

Our 3-hour seminar covers...
embedding ACT/SAT-like
content, assessment, & strategies
in daily classroom teaching.

This session helps demystify the ACT or SAT by explaining its structure, the academic content covered on it, & testing & time management strategies students can employ to maximize their performance on the test. Then we provide teachers with specific suggestions—related to content, assessment, & strategies—that they can implement easily so that their students will be best prepared for what they'll see on the test. Each participant gets a comprehensive, 400-page, reference workbook with access to virtually unlimited numbers of sample questions. In addition, participants take a timed test so that they understand the time constraints under which students work, cover a variety of example questions so that they see how students answer various types of questions correctly, & spend group time with colleagues to discuss how to implement/add ACT/SAT-style questions into assessments.

Teachers will learn specific, tangible items that they can implement immediately in their daily teaching that will make a real difference for their students. With this professional development, they will be able to answer the questions, "What did I learn? How will it impact my teaching? How will I know I am more successful with my teaching?"

Our one-day program is custom structured to fit the needs of each high school client & offers specific suggestions for teachers of various academic subjects—English/Language Arts, Mathematics, Science, & Social Studies. We offer separate elements for English/Language Arts & Mathematics/ Science teachers.
